

## Subject Index

Acetyl methylcarbinol plus biacetyl in cultured buttermilk, 317  
 Acidic free amino compounds in lactic acid starter cultures, 221  
 Activated sludge, effect of 2,4-dinitrophenol on, 95  
*Aerobacter cloacae* and electrode potential measurements of fermenting sauerkraut, 198  
 Air force materials, requirements for fungicides in, 86  
 Alcohol, effect of, on oxidation of steroids by *Cunninghamella blakesleiana*, 14  
 Amino acids, degradation of, by *Lactobacillus casei*, 268  
 Amylase, thermal and pH stability of, from *Bacillus stearothermophilus*, 7  
 production by *Bacillus stearothermophilus* on undefined media, 11  
 Anaerobe jar, use of sodium borohydride for producing hydrogen in, 136  
 Anaerobic spores, effect of recovery media on thermal resistance values of putrefactive, 300  
 media with yeast culture for counting, 226  
 Antibiotics, effect of, upon microflora of milk, 234  
 paper chromatography of antifungal, 181  
 Antifungal antibiotics, paper chromatography of, 181  
 Antiiinfective agents, virucidal activity of, against influenza A and vaccinia viruses, 333  
 Antimicrobial penetrant-sealers, 277  
 Antitubercular drugs, testing by intracorneal infection, 52  
*Aspergillus*, hydroxylation of progesterone and 11-desoxy-17-hydroxy corticosterone by, 336  
*Azotobacter*, effect of herbicides upon respiration of, 288  
*Bacillus cereus*, effect of 2,4-dichlorophen oxyacetic acid on nitrogen metabolism of, 123  
*Bacillus stearothermophilus*, thermal and pH stability of the amylase of, 7  
 amylase production on undefined media by, 11  
 Bacterial culture with controlled pH, 355  
 Bacterial decomposition, of fish stickwater at high temperatures, 202  
 prevention of, of fish stickwater at high temperatures, 205  
 Bacterial levans of intermediate molecular weight, 321  
 Bacterial population, estimation of, by fluorescence microscopy, 231  
 Bacteriological analyses of water, 59  
 Bacteriological studies of cultured buttermilk, 317  
 Bacteriological survey of commercially frozen foods, 98  
 Bacteriophage, and domination among strains of lactic streptococci, 141  
 and similarities among strains of lactic streptococci, 145  
 strain dominance due to action of, 137  
 Bacteriostatic action of sodium nitrite, 154  
 Bacteriostatic nylon films, 238  
 Banked blood, tests for contaminants in, 213  
 Biacetyl and acetyl methylcarbinol in cultured buttermilk, 317  
 Bioautographic assay by micromethod, 152  
 Blood, tests for contaminants in banked, 213  
 Bovine rumen, microbial activity and bloat in, 161  
 Buttermilk, bacteriological studies of cultured, 317  
 Carbohydrate utilization in differentiation of *Streptomyces* species, 1  
 Carbohydrates, sterilization of, with liquid ethylene oxide, 292  
 Carrageenin, enzymic hydrolysis of, 380  
 Chick and guinea pig, comparison of, in evaluation of diphtheria toxin, 242  
 Chromatography of antifungal antibiotics, 181  
 Citric acid and bacteriological studies of cultured buttermilk, 317  
 Coliform and *Escherichia coli* indices, simultaneous determination of, 310  
 Coliform bacteria, bacteriological analyses of water, 59  
 lactose broth, lauryl sulphate broth, and Eijkman method for, 55  
 membrane filters for determination of, in water, 46  
 Coliform test as applied to orange juice, 353  
 Continuous fermentation, principles and applications, 110  
 Copper-8-quinolinolate, antimicrobial properties in penetrant-sealers, 277  
 Cotton, desorption of quaternary nitrogen compounds from, 195  
 Cream filling, effect of serine on bacteria in, 132  
 Cucumber fermentations, effect of sorbic acid on microorganisms in, 341  
*Cunninghamella blakesleiana*, effect of alcohol and phenol on oxidation of steroids, 14  
 medium design and oxidation of steroids by, 16  
*Dactylium dendroides* (Bulliard) Fries, steroid transformation by, 372  
 Desorption of quaternary compounds from cotton and wool, 195  
 11-Desoxy-17-hydroxy corticosterone, hydroxylation of, by *Aspergillus* and *Penicillium*, 336  
 2,4-Dichlorophenoxyacetic acid effect on nitrogen metabolism of *Bacillus cereus*, 123  
 effect on nitrogen metabolism of *Pseudomonas fluorescens* and soil microorganisms, 126  
 Differentiation of *Streptomyces* species by carbohydrate utilization tests, 1  
 Dilutions, magnetic mixing of test tube, 258  
 2,4-Dinitrophenol, effect of, on activated sludge, 95  
 Diphtheria toxin, comparison of guinea pig and chick in evaluation of, 242  
 Disinfectants on inanimate objects, efficiencies and practical procedures, 273  
 physicochemical factors affecting, 71  
 Egg products, modified selenite brilliant green medium for isolation of *Salmonella* from, 295  
 Eggs, detection of *Salmonella* in dried, 368  
 Eijkman method, comparison with lactose broth for detecting coliforms, 55  
 Electrode potential measurements of fermenting sauerkraut, 198  
 Enzymic hydrolysis of carrageenin, 380  
*Escherichia coli* and coliform indices, simultaneous determination of, 310  
*Escherichia coli*, effect of freezing storage on, in green beans, 102  
 effect of menstrua on frozen storage of, 40  
 Ethylene oxide, sterilization of carbohydrates with liquid, 292  
 Fatty acid oxidation by *Penicillium roqueforti*, 264  
 Fecal streptococci in frozen foods, bacteriological survey, 98  
 effect of freezing storage of green beans on, 102  
 effect of freezing storage of orange concentrate on, 104  
 effect of sanitizing and blanching on, 107  
 Fermentation, effects of liquid physical properties on oxygen transfer in penicillin, 253  
 principles and applications of continuous, 110

## Subject Index

Acetyl methylcarbinol plus biacetyl in cultured buttermilk, 317  
 Acidic free amino compounds in lactic acid starter cultures, 221

 Antimicrobial penetrant-sealers, 277  
 Antitubercular drugs, testing by intracorneal infection, 52  
*Aspergillus*, hydroxylation of progesterone and 11-desoxy-17-hydroxy corticosterone by, 336  
*Azotobacter*, effect of herbicides upon respiration of, 288  
*Bacillus cereus*, effect of 2,4-dichlorophen oxyacetic acid on nitrogen metabolism of, 123  
*Bacillus stearothermophilus*, thermal and pH stability of the amylase of, 7  
 amylase production on undefined media by, 11  
 Bacterial culture with controlled pH, 355  
 Bacterial decomposition, of fish stickwater at high temperatures, 202  
 prevention of, of fish stickwater at high temperatures, 205  
 Bacterial levans of intermediate molecular weight, 321  
 Bacterial population, estimation of, by fluorescence microscopy, 231  
 Bacteriological analyses of water, 59  
 Bacteriological studies of cultured buttermilk, 317  
 Bacteriological survey of commercially frozen foods, 98  
 Bacteriophage, and domination among strains of lactic streptococci, 141  
 and similarities among strains of lactic streptococci, 145  
 strain dominance due to action of, 137  
 Bacteriostatic action of sodium nitrite, 154  
 Bacteriostatic nylon films, 238  
 Banked blood, tests for contaminants in, 213  
 Biacetyl and acetyl methylcarbinol in cultured buttermilk, 317  
 Bioautographic assay by micromethod, 152  
 Blood, tests for contaminants in banked, 213  
 Bovine rumen, microbial activity and bloat in, 161  
 Buttermilk, bacteriological studies of cultured, 317  
 Carbohydrate utilization in differentiation of *Streptomyces* species, 1  
 Carbohydrates, sterilization of, with liquid ethylene oxide, 292  
 Carrageenin, enzymic hydrolysis of, 380  
 Chick and guinea pig, comparison of, in evaluation of diphtheria toxin, 242  
 Chromatography of antifungal antibiotics, 181  
 Citric acid and bacteriological studies of cultured buttermilk, 317  
 Coliform and *Escherichia coli* indices, simultaneous determination of, 310  
 Coliform bacteria, bacteriological analyses of water, 59  
 lactose broth, lauryl sulphate broth, and Eijkman method for, 55  
 membrane filters for determination of, in water, 46  
 Coliform test as applied to orange juice, 353  
 Continuous fermentation, principles and applications, 110  
 Copper-8-quinolinolate, antimicrobial properties in penetrant-sealers, 277  
 Cotton, desorption of quaternary nitrogen compounds from, 195  
 Cream filling, effect of serine on bacteria in, 132  
 Cucumber fermentations, effect of sorbic acid on microorganisms in, 341  
*Cunninghamella blakesleiana*, effect of alcohol and phenol on oxidation of steroids, 14  
 medium design and oxidation of steroids by, 16  
*Dactylium dendroides* (Bulliard) Fries, steroid transformation by, 372  
 Desorption of quaternary compounds from cotton and wool, 195  
 11-Desoxy-17-hydroxy corticosterone, hydroxylation of, by *Aspergillus* and *Penicillium*, 336  
 2,4-Dichlorophenoxyacetic acid effect on nitrogen metabolism of *Bacillus cereus*, 123  
 effect on nitrogen metabolism of *Pseudomonas fluorescens* and soil microorganisms, 126  
 Differentiation of *Streptomyces* species by carbohydrate utilization tests, 1  
 Dilutions, magnetic mixing of test tube, 258  
 2,4-Dinitrophenol, effect of, on activated sludge, 95  
 Diphtheria toxin, comparison of guinea pig and chick in evaluation of, 242  
 Disinfectants on inanimate objects, efficiencies and practical procedures, 273  
 physicochemical factors affecting, 71  
 Egg products, modified selenite brilliant green medium for isolation of *Salmonella* from, 295  
 Eggs, detection of *Salmonella* in dried, 368  
 Eijkman method, comparison with lactose broth for detecting coliforms, 55  
 Electrode potential measurements of fermenting sauerkraut, 198  
 Enzymic hydrolysis of carrageenin, 380  
*Escherichia coli* and coliform indices, simultaneous determination of, 310  
*Escherichia coli*, effect of freezing storage on, in green beans, 102  
 effect of menstrua on frozen storage of, 40  
 Ethylene oxide, sterilization of carbohydrates with liquid, 292  
 Fatty acid oxidation by *Penicillium roqueforti*, 264  
 Fecal streptococci in frozen foods, bacteriological survey, 98  
 effect of freezing storage of green beans on, 102  
 effect of freezing storage of orange concentrate on, 104  
 effect of sanitizing and blanching on, 107  
 Fermentation, effects of liquid physical properties on oxygen transfer in penicillin, 253  
 principles and applications of continuous, 110

Fire hose, microbiological damage to unlined flax forestry, 82  
 Fish liver oils, *Mycobacteria* in, 26  
 Fish stickwater, bacterial decomposition of, at high temperatures, 202  
 prevention of bacterial decomposition of, at high temperatures, 205  
 Flax yeast, factors affecting the growth of, 208  
 Fluorescence microscopy, estimation of bacterial population by, 231  
 Food products, detection of *Salmonella* in, 368  
 Food sterilization, heat and radiation in, 346  
 Freezing and storage death, effect of menstrua on, of *Escherichia coli*, 40  
 effect of, on fecal microorganisms in green beans, 102  
 effect of, on fecal microorganisms in orange concentrate, 104  
 effect of, on rhizobia and nodules, 160  
 Frozen foods, fecal streptococci in, and bacteriological survey, 98  
 effect upon green beans, 102  
 effect upon orange concentrate, 104  
 effect of sanitizing and blanching on, 107  
 Frozen storage menstrua and effect on defrosted *Escherichia coli*, 40  
 Fungi, effects of, on electrical insulating materials, 75  
 on D.C. surface conductance, 75  
 on flax forestry hose, 82  
 in domestic sewage-treatment plants, 173  
 methods for determining sterol content of, 247  
 screening of representative yeasts and molds for sterol content, 249  
 Fungicides, fungus proofing of paper and paperboard, 89  
 requirements in air force materials, 86  
 use as antimicrobial penetrant sealers, 277  
 Fungus proofing of paper and paperboard, 89  
 Germicides and blanching temperatures on *Streptococcus faecalis* in frozen foods, 107  
 Stuart method for evaluating, 67  
 tissue toxicity technique for evaluating, 63  
 Green beans, fecal streptococci in frozen, 102  
 Guinea pig and chick, comparison of, in evaluation of diphtheria toxin, 242  
 Heat and radiation in food sterilization, 346  
 Herbicides, effect on respiration of *Azotobacter*, 288  
 effect on soil microorganisms and *Bacillus cereus*, 123  
 effect on soil microorganisms and *Pseudomonas fluorescens*, 126  
 microplating method for soil molds to detect effect of, 190  
 Hood, plastic, portable, safety, for bacteriologists, 216  
 Hydrogen, use of sodium borohydride for producing, in anaerobe jar, 136  
 Hydroxylation of progesterone and 11-desoxy-17-hydroxy-corticosterone by *Aspergillus* and *Penicillium*, 336  
 Influenza A, virucidal activity of antiinfective agents against, 333  
 Insecticides, microplating method for soil molds to detect effect of, 190  
 Intracorneal infection and antitubercular drugs, 52  
 Ion exchange chromatography, measurement by, of compounds in lactic acid starter cultures, 221  
 Lactic acid and bacteriological studies of cultured buttermilk, 317  
 Lactic acid starter cultures, acidic free amino compounds formed by, 221  
 Lactic streptococci, action of bacteriophage on mixed strain cultures of, 137  
 domination among strains of, 141  
 similarities among strains and whey activity test, 145  
*Lactobacilli*, pustule formation by, on fermented vegetables, 314  
*Lactobacillus casei*, degradation of amino acids and serine by, 268  
 Lactose broth, comparison with Eijkman method for detecting coliforms, 55  
 comparison with lauryl sulphate broth for detecting coliforms, 55  
 Lauryl sulphate broth, comparison with lactose broth for detecting coliforms, 55  
*Leuconostoc citrovorum*, numbers in cultured buttermilk, 317  
 Levans, bacterial, of intermediate molecular weight, 321  
 Liquid physical properties on oxygen transfer in penicillin fermentation, 253  
 Magnetic mixing of test tube dilutions, 258  
 Maintenance of industrially important microorganisms, 361  
 Maple syrup, microorganisms as a cause of stoppage of flow of, 149  
 Medium, effect of, on oxidation of steroids by *Cunninghamella blakesleiana*, 16  
 modified selenite brilliant green, for isolation of *Salmonella*, 295  
 recovery, and thermal resistance values of putrefactive anaerobic spores, 300  
 Membrane filters for determination of coliform bacteria in water, 46  
 Mesophilic contaminants in banked blood, tests for, 213  
 Microbial activity and bloat in the bovine rumen, 161  
 Microbiological, damage in flax forestry fire hose, 82  
 deterioration of rubber insulation, 35  
 deterioration of vulcanized rubber, 302  
 fermentation tests, sterilization of carbohydrates with liquid ethylene oxide for, 292  
 Microflora of milk, effect of antibiotics on, 234  
 Micromethod for bioautographic assay, 152  
 Microorganisms as a cause of stoppage of maple sap flow, 149  
 Microorganisms, maintenance of industrially important, 361  
 Microplating method for soil molds, 190  
 Milk, effect of antibiotics on microflora of, 234  
 Mixed strain cultures, bacteriophage and domination among strains of lactic streptococci, 141  
 bacteriophage and similarities among strains of lactic streptococci, 145  
 bacteriophage and strain dominance in, 137  
*Mycobacteria* in fish liver oils, 26  
 Nitrogen metabolism, effect of 2,4-dichlorophenoxyacetic acid on, of *Bacillus cereus*, 123  
 effect of 2,4-dichlorophenoxyacetic acid on, *Pseudomonas fluorescens* and soil microorganisms, 126  
 Nitrogen preferences of *Zoogloea ramigera*, 20  
 Nodules, preservation by freezing of rhizobia and, 160  
 Nylon films, bacteriostatic, 238  
 Orange concentrate, fecal streptococci in, 104  
 Orange juice, presumptive coliform test as applied to, 353  
 Oxygen transfer, effects of liquid physical properties on, in penicillin fermentation, 253  
 Paper and paperboard, fungus proofing of, 89  
 Paper chromatography of antifungal antibiotics, 181  
 Penetrant-sealers, antimicrobial, 277

Penicillin fermentation, effects of liquid physical properties on oxygen transfer in, 253

Penicillin production, effect of temperature on, by *Penicillium chrysogenum* W49-133, 375

*Penicillium chrysogenum* W49-133, effect of temperature on penicillin production by, 375

*Penicillium*, hydroxylation of progesterone and 11-desoxy-17-hydroxyeorticosterone by, 336

*Penicillium roqueforti*, fatty acid oxidation by, 264

pH, bacterial culture with controlled, 355

pH levels in cultured buttermilk, 317

pH stability of an amylase from *Bacillus stearothermophilus*, 7

Phenol, effect of, on oxidation of steroids by *Cunninghamella blakesleiana*, 14

Pickles, sorbic acid preservative for sweet cucumber, 186

Presumptive coliform test as applied to orange juice, 353

Progesterone, hydroxylation of, by *Aspergillus* and *Penicillium*, 336

*Pseudomonas fluorescens*, effect of 2,4-dichlorophenoxyacetic acid on, 126

Psychrophilic contaminants in banked blood, tests for, 213

Pteroylglutamic acid in yeasts, 29

Pustule formation by *Lactobacilli* on fermented vegetables, 314

Quaternary nitrogen compounds, desorption of, from cotton and wool, 195

Radiation in food sterilization, 346

Respiration, effect of herbicides upon, of *Azotobacter*, 288

Respiration studies of *Zoogloea ramigera*, 20

Rhizobia from preserved nodules, 160

Rubber, insulation, microbiological deterioration of, 35  
vulcanized, microbiological deterioration of, 302

Rumen, microbial activity and bloat in bovine, 161

Safety hood, plastic, for bacteriologists, 216

*Salmonella*, detection of, in dried eggs and other food products, 368  
modified selenite brilliant green medium for isolation of, from egg products, 295  
selenite brilliant green medium for isolation of, 217

Sauerkraut, electrode potential measurements of fermenting, 198

Schick test, comparison of guinea pig and chick for evaluating diphtheria toxin, 242

Screening, for antitubercular drugs by intracorneal infection, 52  
of fungi for sterol content, 249

Selenite brilliant green medium for the isolation of *Salmonella*, 217  
modified, for isolation of *Salmonella* from egg products, 295

Serine, effect of, on bacteria in cream filling, 132  
deamination of, by *Lactobacillus casei*, 268

Sewage-treatment plants, fungi in domestic, 173

Sodium borohydride, use of, for producing hydrogen in an anaerobe jar, 136

Sodium citrate and bacteriological studies of cultured buttermilk, 317

Sodium nitrite, bacteriostatic action of, 154

Soil microorganisms, effect of 2,4-dichlorophenoxyacetic acid on *Bacillus cereus*, 123

effect of 2,4-dichlorophenoxyacetic acid on *Pseudomonas fluorescens*, 126

effect of herbicides upon respiration of *Azotobacter*, 288

microplating method for detecting effect of herbicides and insecticides, 190

Sorbic acid, as a selective agent in cucumber fermentations, 341  
preservative for sweet pickles, 186

Spores, effect of recovery media on thermal resistance values of anaerobic, 300

Sterilization of carbohydrates with liquid ethylene oxide, 292

Steroid transformation by *Dactylium dendroides* (Bulliard Fries), 372

Steroids, oxidation of, by *Cunninghamella blakesleiana*, 14, 16

Sterol content of fungi, methods, 247  
screening, 249

Stickwater, bacterial decomposition of, at high temperatures, 202  
prevention of bacterial decomposition of, at high temperatures, 205

Streptococci, in frozen foods, bacteriological survey of fecal, 98  
effect of freezing storage of green beans on fecal, 102  
effect of freezing storage of orange concentrate on fecal, 104  
effect of sanitizing and blanching on fecal, 107

*Streptococcus cremoris*, numbers in cultured buttermilk, 317

*Streptomyces* species, differentiation of, by carbohydrate utilization tests, 1

Stuart method for evaluating germicides, 67

Sweet cucumber pickles, sorbic acid preservative for, 186

Synergism between yoghurt bacteria and yeasts, 129

Temperature, effect of, on penicillin production by *Penicillium chrysogenum* W49-133, 375

Tests for psychrophilic and mesophilic contaminants in banked blood, 213

Thermal resistance values of anaerobic spores in recovery media, 300

Thermostability of an amylase from *Bacillus stearothermophilus*, 7

Tissue toxicity technique for germicidal substances, 63

Vaccinia viruses, virucidal activity of antiinfective agents against, 333

Vegetables, pustule formation by *Lactobacilli* on fermented, 314

Virucidal activity of antiinfective agents against influenza A and vaccinia viruses, 333

Vulcanized rubber, microbiological deterioration of, 302

Water, bacteriological analyses of, 59

Whey activity test for lactic streptococci culture selection, 145

Wool, desorption of quaternary nitrogen compounds from, 195

Yeast culture, supplementation of media with, for counting anaerobic spores, 226

Yeast, factors affecting the growth of flor, 208  
pteroylglutamic acid and related compounds in, 29  
synergism between yoghurt bacteria and, 129

Yoghurt bacteria, synergism between yeasts and, 129

*Zoogloea ramigera*, nitrogen preferences of, 20
